Tiburon 2.7 clutch problem solved - Tiburon 2.7 clutch problem solved by theblinbuilder 15,339 views 9 years ago 1 minute, 37 seconds

My problem was that my slave cylinder blew up. I bought a new slave cylinder (like \$27) and there was a huge gap between the slave hook, and the clutch lever

After hours and days, two different clutch kits, and a lot of measuring, we find out the problem was a bent clutch fork.

PLEASE understand that a bent clutch fork like this is NOT notisable by human eye. So dont waste your time even with a magnifier.

Always BLOWN UP? WHY? Hyundai / Kia 2.4 Theta II G4KE Engine Teardown - Always BLOWN UP? WHY?
